

COOL COMFORT Stop Warts Cold with Histofreezer® Portable Cryosurgical System

RESOLVE COMMON WARTS, GENITAL WARTS AND KERATOSES

THE WELL-TOLERATED WAY TO REMOVE WARTS

- Minimal patient discomfort
- Less damage to healthy tissue

PROVEN CLINICAL PERFORMANCE

- 86% - 100% resolution rates for benign lesions
- Nine indications

EASY-TO-USE

- One-handed operation
- Less than one-minute procedure

EXCELLENT REIMBURSEMENT

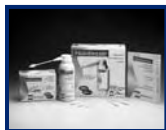

- Covered by all major insurance
- Low cost per treatment

6039-H-30

H-30 Convenience Kit: 30 Mixed Applicator Kit Includes: (1) 80mL canister of cryogen; (15) 2mm and (15) 5mm applicators, detailed instructions with a two-year shelf-life.

6039-H-60

H-60 Economy Kit: 60 Mixed Applicator Kit Includes: (1) 170mL canister of cryogen; (30) 2mm and (30) 5mm applicators, detailed instructions with a three-year shelf-life.

6039-H-505

H-505 Specialty Kit: 50 Large Applicator Kit Includes: (1) 170mL canister of cryogen; (50) 5mm applicators, detailed instructions for larger size lesions and plantar warts with a three-year shelf-life.

Brymill's CRY-AC® Hand-held Liquid Nitrogen Cryosurgical Systems

Brymill is the world's leading manufacturer of handheld, liquid nitrogen cryosurgery devices used by physicians to freeze and remove a wide range of skin lesions, including Verruca (warts), Actinic Keratoses, Seborrhic Keratoses, Molluscum, Papilloma (skin tags), and many others.

The #1 choice of dermatologists, Brymill is being used by more and more general practitioners to expand their practices.

Brymill's CRY-AC® (16 oz./500 ml capacity) and CRY-AC®-3 (10 oz./300 ml capacity) cryospray equipment offer unsurpassed convenience, safety, versatility, and control for more precise and effective cryosurgery treatments. Not only do Brymill's CRY-AC® liquid nitrogen units provide the coldest (-196°C) & most effective cryosurgical technique, it is MUCH less costly to use Brymill than disposable spray units on an ongoing basis.

5 spray tips with varying sized apertures (one each with .04 in., .031 in., and .016 in. apertures and two with .022 in. apertures) and one 20-gauge bent spray are included with CRY-AC® and CRY-AC®-3 systems for more accurate,

controlled treatment of lesions of different sizes and types.

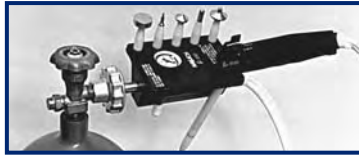

Brymill offers the largest selection of LN₂ cryosurgical tips, probes, and accessories, including the 20-liter LongLast dewar that stores liquid nitrogen for up to 300 days.

- 9861-B-700 CRY-AC®, 16 fluid oz./500 ml., Larger size for greater capacity & longer holding time
- 9861-B-800 CRY-AC®-3, 10 fluid oz./300 ml., Smaller size for easier handling
- 9861-501-20SC LongLast storage dewar, 20 liters, Holds liquid nitrogen up to 300 days

Wallach LL100 Cryosurgical Freezer

The advanced LL100 employs a unique two-trigger system for faster freezing and defrosting which is key to LL100's superiority. Angled design allows an unobstructed view of the treatment area, both tip and tissue. Cryotips may be changed without turning valves or venting high pressures. Non-electric instant freeze/defrost system uses either nitrous oxide or carbon dioxide gas, with correct porting to vent off the gas with a scavenger hose. A variety of cryosurgical tips are available.

Seiler Model 935 Colposcope

The 935 is the workhorse when it comes to economically priced colposcopes. The 3-step optical pod with a 300mm working distance objective lens offers magnifications of 3x, 7x, and 17x, is mounted on a vertical post and roll-around floor stand. Comes with fan cooled dual-port variable fiber optic coaxial illumination. Should a lamp fail during an examination, the dual-port feature allows a quick change from one lamp to another resulting in an uninterrupted procedure. Comes with a green filter, spare lamp, dust cover, and instruction manual. Accessories for video and digital video are readily available.

5766-30935-3 Model 935 Colposcope

Seiler Model 955 Colposcope

The 955 offers a smooth 5-step optical pod and 300mm working distance objective lens with magnifications of 3x, 4x, 7x, 11x, and 17x. The 955 is mounted on a pantographic swing-arm, and easy to maneuver roll-around floor stand. Comes with fan cooled dual-port variable fiber optic coaxial illumination. Should a lamp fail during an examination, the dual-port feature allows a quick change from one lamp to another resulting in an uninterrupted procedure. Comes with a green filter, spare lamp, dust cover, and instruction manual. Accessories for video and digital video are also readily available.

5766-30955-5 Model 955 Colposcope

Seiler Model 965Z Colposcope

The model 965Z has a continuous zoom magnification system from 2x through 14x with a 300mm working distance objective lens. The 965Z is mounted on a pantographic swing-arm, and an easy to maneuver roll-around floor stand. Comes with fan cooled dual-port variable fiber optic coaxial illumination. Should a lamp fail during an examination, the dual-port feature allows a quick change from one lamp to another resulting in an uninterrupted procedure. Comes with a green filter, spare lamp, dust cover, and instruction manual. Accessories for video and digital video are also readily available.

Wallach Zoomstar™ Colposcope

The Zoomstar offers significant advantages over single or multiple magnification colposcopes. The stereoscopic Nikon head with Nikon Zoom optics offers a sharp, true 3-D image. Correct magnification, from 4.5X to 20X, and adequate field of view at all times. Laser compatible. It uses a transformerless halogen fiber optic light source with a continuous brightness adjustment. A 30° angle eyepiece for a more natural position. Center post suspension uses a unique 5-point base which can be maneuvered easily.

6727-906057 Zoomstar™

Wallach Zoomscope™ Colposcope/ Operating Microscope

The Zoomscope is two optical instruments in one—a colposcope and an operating microscope. Meets nearly every diagnostic need and is laser compatible. Nikon head with Nikon optics. An area can be examined, then zoomed in on for a closer examination or biopsy without changing eye-pieces. Easy to use because it has advanced suspension. Just move it and it stays put, no knobs, no dials. It is also lighter and more maneuverable. It has eliminated the light transformer and uses a cool, fiber optic light source.

6727-906043 Zoomscope™ Colposcope/Oper. Microscope
